

The screenshot shows a DataCamp course titled "Introduction to GitHub Concepts". The course is part of the "Break Into THE AI 1%" track. It consists of three chapters: 1. Introduction to GitHub, 2. Working with Repos, and 3. Collaboration with GitHub. Each chapter has a progress bar at 100%. The sidebar on the left shows navigation options like Progress, My library, Leaderboard, Assignments, Tracks, Courses, Practice, Assessments, Tutorials, Real World Projects, Code Alongs, Competitions, and a Getting Started section (1/4). The right sidebar includes sections for GitHub prerequisites (Intermediate Git), part of other tracks (GitHub Foundations), and instructors (George Boorman and Jasmin Ludolf).

BREAK INTO THE AI 1%

For teams turning AI plans into action

1 Introduction to GitHub 100%
In this first chapter, you'll learn all about GitHub, its many benefits, and how it differs from Git. You'll understand how to create a repository and a README file for your data projects.

View Chapter Details ✓ Complete

2 Working with Repos 100%
Now it's time to discover how to work with repos in GitHub. You'll see how to add, modify, and delete files, switch branches, create private repos, add collaborators, and generate Personal Access Tokens!

View Chapter Details ✓ Complete

3 Collaboration with GitHub 100%
This final chapter will guide you through various collaboration techniques on GitHub. You'll gain knowledge on the different ways to copy a repository, how to communicate with your peers on GitHub, and all about pull requests. After this chapter, everyone will want you on their team!
